Interface Overview:

Installation:

Double click on setup.exe.

Usage:

Adding Files for operation

Click on File > Open PDF to add files. You can add more than one file at a time. You can add files by drag and drop. Just drag pdf files and drop on the list view.

Up-down file position:

Select a file and click up Button for up and down Button for down. You can use up-arrow and down-arrow key from key board to up-down file position.

To remove a file from list first click on it then click on remove icon. You can use delete key from keyboard to delete file from list.

* Read pdf file:

Select a file from list.

Select Reader Tab. You can see the pdf file and bookmarks if it has bookmarks.

You can minimize the bookmark of a pdf file by clicking hide button.

Settings:

Click on settings tab.

Set default folder, file name prefix and replacing option you want.

These settings are optional.

Operation:

•						
•	`	n	ш	Пr	٦ø	•
•		יש			מי	۰

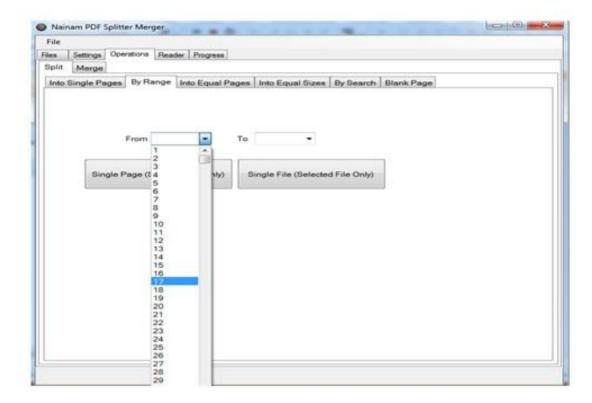

☐ Single page splitting:

Click Operations> Split>Split Into Single Pages.

□ Split By Range:

Click Operations> Split

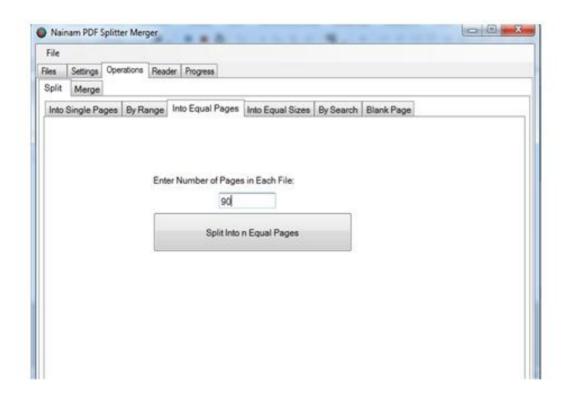

Select From and To from dropdown menu.

Click Single Page or Single File as you want.

☐ Split by equal page:

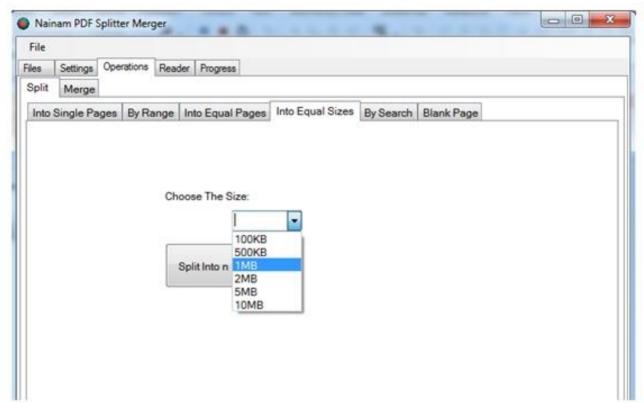

Click Operations> Split

Enter the number of page per file into box and click Split Into n Equal Pages Button.

☐ Split into equal size:

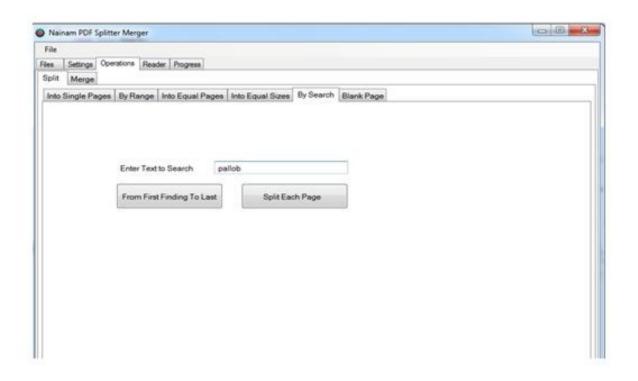

Click Operations> Split

Select your desired file size from drop down menu. Then click Split Into n Equal Size Button.

☐ Split By Search:

Click Operations> Split

Enter the text you want to search and press button.

"From first finding to last" if you want a single file on search range.

"Split each page" if you want every page containing your word in a single page pdf.

☐ Split by blank page:

you can remove blank page from your pdf file. Select Operations> Split> Remove all Blank Page.

☐ Split by bookmark:

Select Reader Tab and you can see the bookmark. If you do not see the bookmark then click on leftmost button to see bookmark. Right click on any bookmark> Set from by clicking left mouse button on from menu> select To> Then select Single File or Single Page. Single file means all pages into a single file. And single page means each page as a pdf file.
